INSIDE INFORMATION ANNOUNCEMENT
ADJUSTMENT TO THE TIERED ELECTRICITY PRICING POLICY
FOR HOUSEHOLDS

This announcement is made by Sichuan Energy Investment Development Co., Ltd.* (the “**Company**”) pursuant to Rule 13.09(2) of the Rules Governing the Listing of Securities (the “**Listing Rules**”) on The Stock Exchange of Hong Kong Limited (the “**Stock Exchange**”) and the Inside Information Provisions under Part XIVA of the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong).

The board of directors (the “**Board**”) of the Company hereby informs the shareholders (the “**Shareholders**”) and potential investors of the Company that, in order to thoroughly implement the policy decisions made at the Third Plenary Session of the 20th Central Committee of the Communist Party of China regarding the optimization of the tiered electricity pricing system for households, and in accordance with the provisions of the Guiding Opinions on the Trial Implementation of Tiered Electricity Pricing for Electricity Consumption for Households (Fa Gai Jia Ge [2011] No. 2617) (《關於居民生活用電試行階梯電價的指導意見》(發改價格[2011]2617號)) issued by the National Development and Reform Commission (中華人民共和國國家發展和改革委員會), and taking into account the electricity consumption characteristics and the actual supply and demand of electricity of households in Sichuan Province, the Sichuan Provincial Development and Reform Commission (四川省發展和改革委員會) issued the Notice on Matters Concerning the Adjustment of the Tiered Electricity Pricing Policy for Households in the Sichuan Province (Chuan Fa Gai Jia Ge [2026] No. 255) (《關於調整我省居民階梯電價政策有關事項的通知》(川發改價格[2026]255號)) (the “**Adjustment to the Tiered Electricity Pricing Policy for Households**”) on 25 June 2026, which is scheduled to take effect from 1 July 2026. The aforesaid Adjustment to the Tiered Electricity Pricing Policy for Households is expected to have a certain impact on the Company’s operating performance for the year 2026.

I. Summary of the Adjustment to the Tiered Electricity Pricing Policy for Households

- (I) Adjustment to summer monthly tiered electricity consumption thresholds for households. For households in the Sichuan Province subject to tiered electricity pricing, during the summer months (July to September), the first-tier monthly electricity consumption threshold shall be 0–260 kWh, the second-tier threshold shall be 261–460 kWh, and the third-tier threshold shall be above 460 kWh. For households covered by the “one household with multiple persons (一戶多人口)” policy under the tiered electricity pricing scheme for households, the tiered electricity consumption thresholds shall be adjusted accordingly. The tiered pricing rates and the tiered consumption thresholds for other months shall remain unchanged.
- (II) Promoting uniform electricity pricing for households across the Sichuan Province. Where the current households’ electricity price standards within the service areas of various power grid enterprises are higher than those of the Sichuan Power Grid, or where the tiered electricity consumption thresholds are lower than those of the Sichuan Power Grid, such standards or thresholds shall be uniformly aligned with the relevant standards or levels of the Sichuan Power Grid.
- (III) Establishment of a monthly tiered electricity consumption carry-over system. With effect from January 2027, any unused electricity consumption under the first and second tiers for users subject to the tiered electricity pricing policy for households will be carried over on a monthly basis to the corresponding tiers in subsequent months within the same year, and shall be cleared at the end of the year. The incremental tiered electricity resulting from the implementation of the “one household with multiple persons (一戶多人口)” policy under the tiered electricity pricing scheme for households shall be included in the scope of such carry-over.

The Adjustment to the Tiered Electricity Pricing Policy for Households will come into effect on 1 July 2026.

II. Impact of Adjustment to the Tiered Electricity Pricing Policy for Households on the Company

Following the implementation of the Adjustment to the Tiered Electricity Pricing Policy for Households, the average selling price for the household living electricity category for the full year is expected to decrease, which will have a certain impact on the Company’s operating performance for the year 2026. The final impact amounts shall be subject to the data as set out in the Company’s audited financial reports for the year 2026.

Shareholders and potential investors of the Company are advised to exercise caution when dealing in the securities of the Company.

By order of the Board
Sichuan Energy Investment Development Co., Ltd.*
